

**Customer Pagers**  
(Available in Red, Green & Blue)

## Increase store sales and serve pharmacy customers faster with LRS Paging systems

LRS guest and staff pagers have been helping pharmacies increase in-store sales, improve customer service and boost staff efficiency since 1993.

### Customer Paging

Don't lose potential store sales because customers have to wait in the pharmacy for prescriptions. Hand them one of our on-site pagers so they can shop while they wait. When the prescription is filled, silently page them to let them know. That way, they won't interrupt your pharmacy staff before it's ready.

- Ideal for all drug and grocery store pharmacies
- All guest pagers can flash, beep, vibrate, or glow
- Most durable and highest quality pagers on the market
- Anti-theft & Auto-locate feature minimizes pager loss
- Protects customer privacy
- Nickel Metal Hydride Batteries last years longer with no "memory" problems
- Free 24/7 live technical support line
- Lifetime warranties available

Double-sided advertising space promotes store specials

### Customer Assistance Paging

Nothing irritates a customer more than needing assistance and no one is around. Make sure that doesn't happen with the wireless Butler II push-for-service system. Your customer just presses a button and your staff can be there right away.

- Customers no longer have to track down help
- Improves response time
- No hardwiring required - operates on 3 AAA batteries
- Attaches to almost any surface
- Available in one and five-button models
- Buttons can be programmed to page staff or managers with an LRS Alphanumeric Pager

### Staff Paging

Butler II can also be used for staff-to-staff paging. Mount it in the pharmacy or near the cash register so staff can page for additional help during busy hours. They can also page for immediate manager assistance. That way, checkout lines move faster so more sales can be processed in a shorter time.

### Morotola Two-Way Radio

Although our pagers will meet most of your needs, we know that two-way verbal communication is sometimes required. That's why we offer our reliable Morotola two-way radio and accessories. Perfect for today's larger, fast-paced pharmacies and stores. Headsets are also available.
