Simple Staff Paging

This portable, wireless transmitter notifies staff with the touch of a button.

One-Touch Paging Up to 20 Servers

The T9560EZ transmitter is a simple, affordable component of a complete LRS staff paging solution. Used by restaurant kitchens to notify wait staff when food is ready, the T9560EZ helps speed up food delivery by instantly paging servers. With the touch of a button, servers are silently notified when food is ready to be delivered, thus enhancing the guest experience.

HOW IT WORKS

1 Assign
Provide a wireless LRS pager for your servers to wear and write the server's name next to each number on the built-in dry-erase board on the T9560EZ.

2 Notify
Kitchen staff pushes the corresponding server number on the T9560EZ when their order is ready.

3 Serve
Servers receive a silent message to retrieve their order, so they can deliver food faster to guests.

Enhance Customer Experience
Staff paging speeds up food delivery and gives guests an overall better experience. Food is delivered faster and fresh. No more bells or name shouting.

Increase Staff Productivity
Give staff the tools they need to be more efficient and productive with their time. Staff is able to serve customers better, knowing they will be notified when orders are ready for delivery.

Boost Revenue
Turn tables faster and increase check and tip averages with staff messaging. Serve guests quickly and give guests the service they expect.
